TITAN HST ALERT CARDS

Request Help From Anywhere. Privately and Securely.

- ✓ ***Quickly & discretely request assistance*** without the need for a mobile phone.
- ✓ ***Privacy-by-Design:*** User location is only shared when the Alert Card is triggered. Once triggered, the Alert Card will share real-time GPS location. Pair Alert Cards with Micro-Location Beacons to view precise location.
- ✓ ***Programmable Buttons:*** Have 1 or 3 buttons routed to designated personnel per Alert type. Eg. Emergency alerts routed to Security Personnel, Medical alerts routed to medical personnel, etc.
- ✓ ***Alert Confirmation:*** When an alert is “acknowledged” by the Alert Receiver (eg. Security), the Alert Button will vibrate and a discrete LED will light on the card notifying the sender that help is on the way.
- ✓ ***Redundant Connectivity:*** For a more reliable and redundant solution: WiFi, Cellular, and Satellite Data (coming soon).
